

Publications (Complete List)

Jan van Leeuwen

*Department of Information and Computing Science
Utrecht University, Utrecht, the Netherlands
Version: Januari 2011*

(Proceedings, handbooks, special issues etc are marked by **.)

1970

“Facts about stack-automata, related devices and their languages”, Abstract No. 2 (Survey), Seminar on Automata Theory and Mathematical Linguistics, Dept. of Mathematics, University of Utrecht, Utrecht, Spring 1970.

“The general theory of translation”, Abstract No. 6 (Survey), Seminar on Automata Theory and Mathematical Linguistics, Dept. of Mathematics, University of Utrecht, Utrecht, Spring 1970.

“Automata, transducers, recognizers”, Abstract No. 6a (Survey), Seminar on Automata Theory and Mathematical Linguistics, Dept. of Mathematics, University of Utrecht, Utrecht, Spring 1970.

“Short introduction to the mathematical theory of linear sequential machines”, Abstract No. 12 (Survey), Seminar on Automata Theory and Mathematical Linguistics, Dept. of Mathematics, University of Utrecht, Utrecht, Spring 1970.

“Brackets and parentheses in the theory of context-free languages”, Abstract No. 6 (Survey), Seminar on Automata Theory and Mathematical Linguistics, Dept. of Mathematics, University of Utrecht, Utrecht, Winter 1970.

1971

“On compositions of semi-groups”, Notices Amer. Math. Soc. 18 (1971), 405, 71 T-A56.

“Grammatica’s en Lindenmaier’s model voor cellular development”, Research Communication (ERCU-102-0), Electronisch Rekencentrum, University of Utrecht, Utrecht, Spring 1971.

“Canonical restrictions of Lindenmayer languages”, Proc. IVth Int. Congr. for Logic, Methodology and Philosophy of Science, Bucharest, Romania, 1971.

“Rule-labeled programs - a generalization of the notion of context-free grammar”, Abstract No. 1, Seminar on Syntactical and Semantical Problems in Theoretical Computer Science,

Dept. of Mathematics, University of Utrecht, Utrecht, 1971.

1972

“Rule-labeled programs” (A study of a generalization of contextfree grammars and some classes of formal languages), Ph.D. Thesis, Utrecht, 1972.

“A note on uniform Lindenmayer languages”, techn. memorandum, Dept. of Computer Science, University of California, Berkeley, 1972.

“Unary developmental systems and languages”, (with G.T. Herman, K.P. Lee, and G. Rozenberg), Technical Report, Dept. of Computer Science, State University of New York at Buffalo, Buffalo, 1972.

1973

“Characterization of unary developmental languages”, (with G.T. Herman, K.P. Lee, and G. Rozenberg), Discrete Mathematics 6 (1973) 235-247.

“Rascal” (A programming language for finite automata), (with Th.A. Zoethout, et al.), LO-COS 4, Dept. of Mathematics, University of Utrecht, Utrecht, 1973.

“Pre-set push-down automata and OL-grammars”, Techn. Report 10, Dept. of Computer Science, Univ. of California, Berkeley, 1973.

“On the efficient validation of execution-sequences of simple recursive and parallel programm-schemata”, presented at the Symp. on Complexity of Sequential and Parallel Numerical Algorithms, Carnegie-Mellon Univ. Pittsburgh, 1973.

“F-iteration languages”, techn. memorandum, Dept. of Computer Science, University of California, Berkeley, 1973.

“Hyper-AFLs and all preset push-down automaton languages are indexed”, techn. memorandum, Dept. of Computer Science, Univ. of California, Berkeley, 1973.

“The halting-problem for Turing assemblers”, (with R.M. Baer) Techn. Report 23, Dept. of Computer Science, Univ. of California, Berkeley, 1973.

“Planar realizations of networks”, Buffalo 1973 (submitted to Discrete Mathematics).

“On the fixpoints of monogenic functions in free monoids”, Report, Dept of Computer Science, State University of New York, Buffalo, 1973, revised: Techn. Report, Mathematical Centre, Amsterdam, 1975, also in: Semigroup Forum 10 (1975) 315-328.

1974

“An intrinsic generalization of Büchi’s theorem for regular canonical systems”, Buffalo, 1973, Abstract presented at the Computer Science Conference, Detroit, February 12-14, 1974.

“A partial solution of the reachability problem for vector-addition systems and some applications”, Proceedings of the Sixth Annual ACM Symposium on Theory of Computing, Seattle, April 30 - May 2 (1974, 303-309).

“The tape-complexity of context-independent developmental languages”, Proceedings of the Conference on Biologically Motivated Automata Theory, McLean, VA, June 19-21, 1974, revised version: Journal of Computer and System Sciences 11 (1975) 203-211.

“A generalization of Parikh’s theorem in formal language theory”, Technical Report No. 71, Buffalo, 1974, also in the Proceedings of the 2nd Colloquium on Automata, Languages and Programming, Saarbrücken, July 29 - August 2, 1974, Springer Lecture Notes in Computer Science 14, pp. 17-26.

“An improved bound for detecting looping configurations on deterministic pda’s”(with C. Smith), Technical Report 67, Buffalo, 1974, Information Processing Letters 3 (1974) 22-24.

“Notes on preset pushdown automata”, Proceedings of the Conference on Developmental Languages, Aarhus, Denmark, Springer Lecture Notes in Computer Science 15 (1974) 177-188.

“Microprogrammable random access stored program machines”, (together with C. Smith), SIGACT NEWS 6 (1974) July issue pp. 23-32.

“A decomposition theorem for hyper-algebraic extensions of language families”, (together with D. Wood), Technical Report No. 74/6, Mc. Master University, Hamilton, Ontario, 1974, revised version: Theor. Computer Science 1 (1976) 199-214.

“An improvement of the Hadian-Sobel bound for selecting the t -th largest of n elements”(with P.J. Eberlein and John Moore), Buffalo, 1974 (in preparation).

“Reconsidering a problem of M. Ward”, Notes on Logic and Computer Science (LOCOS) No. 8, University of Utrecht, Utrecht, 1974, published in: 18th Anniv. Volume of the Fibonacci Quarterly, 1980.

“Symposium on Biologically Motivated Automata Theory: report”, Utrecht, 1974, SIGACT NEWS 6 (1974) October issue, pp. 9-10.

“The membership question for ETOL languages is polynomially complete”, Notes on Logic and Computer Science (LOCOS) No. 9, University of Utrecht, Utrecht, 1974, in: Information Processing Letters 3 (1975) 138-143.

“Efficiently computing the product of two binary relations”, Notes in Logic and Computer Science (LOCOS) No. 10, University of Utrecht, Utrecht, 1974, in: Int. J. Computer Mathematics 5 (1976) 193-201.

“A forgotten connection between tag systems and parallel rewriting”, SIGACT NEWS 6 (1974) October issue, pp. 19-20.

“Extremal properties of non-deterministic time-complexity classes”, Notes in Logic and Computer Science (LOCOS) No. 11, University of Utrecht, Utrecht, 1974, in: E. Gelenbe & D. Potier (Ed.): International Computing Symposium 1975, North Holland/American Elsevier, Amsterdam (1975) 61-64.

** “Introduction to the analysis of computer-algorithms”, (lecture notes in Dutch), Notes in Logic and Computer Science (LOCOS) No. 12, University of Utrecht, Utrecht, 1974.

“Fast algorithms for non-singular matrices”, Notes in Logic and Computer Science (LOCOS) No. 19, University of Utrecht, Utrecht, 1974.

“The complexity of set-merging with less than a linear number of FINDS”, Notes in Logic and Computer Science (LOCOS) No. 21, University of Utrecht, Utrecht, 1974.

1975

“Infinite chains of hyper-AFL’s”, (together with P.R.J. Asveld), Techn. Memorandum, Twente Technological University, 1975.

“Aspects of general complexity in hyper-algebraic families”, Notes in Logic and Computer Science No. 23, University of Utrecht, Utrecht, (1975), presented at the Conference on Languages and Development, Noordwijkerhout, April 1-6 (1975).

“A study of complexity in hyper-algebraic families”, Techn. Report, Mathematical Centre, Amsterdam (1975), in A. Lindenmayer & G. Rozenberg (Ed.): Automata, Languages, and Development, North Holland Publ. Comp. (1975).

“On the non-vanishing terms in a product of multivariate polynomials”, Techn. Report, Mathematical Centre, Amsterdam, 1975.

“The halting problem for linear Turing Assemblers”, (with R.M. Baer), revised version, Techn. Report, Mathematical Centre, Amsterdam, 1975, in: Journ. of Computer and System Sciences 13 (1976) 119-135.

“Deterministically recognizing EOL-languages in time $O(n\text{-to-the-}3.81)$ ”, Techn. Report, Mathematical Centre, Amsterdam, 1975.

“Computing a polynomial and all its derivatives in a small number of multiplications and no division”, presented at the Dutch Mathematical Congress, Utrecht, 1975.

“An improved bound on the number of multiplications and divisions necessary to evaluate a polynomial and its derivatives”, (with L.S. de Jong), SIGACT NEWS 7 (1975), Summer

issue, pp. 32-34.

“Een beschouwing over de afdeling Informatica”, (in Dutch) Internal report, Mathematical Centre, Amsterdam, 1975.

“Some elementary proofs of lower-bounds in complexity”, (with P. van Emde Boas), Techn. Report, Mathematical Centre, Amsterdam, 1975, revised version in: *J. Lin. Algebra and Appl.* 19 (1978) 63-80

“An algebraic theory of formal languages”, contributed paper, Vth Int. Congress for Logic, Methodology, and Philosophy of Science, London, Ontario (1975).

1976

“The complexity of vector-products”(with D. Dobkin), *Information Processing Letters* 4 (1976) 149-154.

“On finding lowest common ancestors in less than logarithmic average time”, presented at the symposium on Recent Results and New Directions in Algorithms and Complexity Theory, Carnegie-Mellon University April 7-9, 1976.

“One way machines using a checking stack”, Techn. Report 108, Dept. of Computer Science, State University of New York, Buffalo (1976).

“Recursively enumerable languages and van Wijngaarden grammars”, Techn. Rep. 112, SUNY at Buffalo (1976), *Indagationes Mathematicae* 80 (1977) 29-39.

“Lectures on the complexity of data-organization (recent directions)”, chapter 2 in J.W. de Bakker (Ed.): *2nd Advanced Course on Foundations of Computer Science*, MC Tract 81 (1976) 37-147, Mathematical Centre, Amsterdam.

“On the construction of Huffman-trees”, in S. Michaelson, R. Milner (Eds.): *Automata, Languages and Programming (Proceedings of the 3rd Colloquium, Edinburgh, July 20-23, 1976)*, Edinburgh University Press (1976) 382-410.

“Variations of a new machine-model”, Conference-record 17th Annual IEEE Symp. on Foundations of Computer Science, Houston, Texas (Oct. 25-27, 1976), pp. .. - ...

“Effective constructions in well-partially-ordered free monoids”, Techn. Rep. 203, The Pennsylvania State University (1976), in: *Discrete Math.* 21 (1978) 237-252.

“A regularity condition for parallel rewriting systems”, *SIGACT NEWS* 8 (1976) 24-27 (also *SIGACT NEWS* 9 (1977) 9).

“What makes some program-optimization problems hard”, Techn. Rep. 206, The Pennsylvania State University (1976).

“Testing for a Grundy-numbering is NP-complete”, Techn. Rep. 207, The Pennsylvania State University (1976).

“A generalization of star chains”, Techn. Rep. 209, The Pennsylvania State University (1976).

“An extension of Hansen’s theorem for star chains”, Techn. Rep. 211, The Pennsylvania State University (1976), *J. Reine u. Angew. Math.* 295 (1977) 202-207.

“Evaluating a polynomial and its reverse”, memorandum, The Pennsylvania State University (1976), SIGACT NEWS, Spring 1978.

1977

“Inequivalence of program segments and NP-completeness”, Techn. Rep. 217, The Pennsylvania State University (1977).

“On the analysis of some halving procedures for binomial group testing” (with C.G. Pfeifer and Peter Enis), Techn. Rep. 77-5, University of Maryland B.C. (1977) (submitted to *Biometrika*).

“On the complexity of decision trees, the quasi-optimizer, and the power of heuristic rules” (with N.V. Findler), Techn. Rep., SUNY at Buffalo (1977), *Inf. and Contr.* 40 (1979) 1-19.

“Deciding associativity for partial multiplication tables of order 3” (with P.W. Bunting and D. Tamari), Techn. Rep. 219, The Pennsylvania State University (1977), *Math. of Computation* 32 (1978) 593-605.

“Stack automata and classes of nonnested macro languages” (with J. Engelfriet and E. Meineche Schmidt), Techn. Rep. 221, The Pennsylvania State University (1977), revised as Techn. Rep. RUU-CS-77-2, University of Utrecht (1977), also *JACM* 27 (1980) 96-117.

“Report on the 4th International Colloquium on Automata, Languages, and Programming”, *EATCS Bulletin* 3, 1977, pp. 10-12.

“Alternative path compression techniques” (with Th. van der Weide), Techn. Rep. RUU-CS-77-3, University of Utrecht (1977) (presented at Oberwolfach).

** “Introduction to database systems” (210 p., in Dutch), Techn. Rep. RUU-CS-77-4, University of Utrecht (1977).

1978

“A useful lemma for contextfree programmed grammars”, Techn. Rep. RUU-CS-78-1, Uni-

versity of Utrecht (1977), *Acta Informatica* 11 (1979) 373-386.

“Compromising statistical databases with a few known elements”, Techn. Rep. RUU-CS-78-2, University of Utrecht (1978), *Inf. Proc. Letters* 8 (1979) 149-153.

“Linear time generation of a new fixed length data-compression code”, Techn. Rep. RUU-CS-78-3, University of Utrecht (1978).

“File-optimalization through migration of records”(in Dutch), in J.C. van Vliet (ed.), *Colloquium Capita Datastructuren*, MC Syllabus 37, Mathematical Centre, Amsterdam (1978), pp. 187-206.

“Move rules and trade-offs in the pebble game”(with P. van Emde Boas), Techn. Rep. RUU-CS-78-4, University of Utrecht (1978), *Proc. 4th GI Conference on Theoretical Computer Science*, Springer Lect. Notes in Comput. Sci. 67 (1979) 101-112.

“The composition of fast priority queues”, Techn. Rep. RUU-CS-78-5, University of Utrecht (1978) (presented at the GI Jahrestagung, TU Berlin, 1978), abstract in: *GI-8.Jahrestagung, Informatik-Fachberichte* vol 16, Springer-Verlag, Berlin, 1978, p. 337.

1979

“On program efficiency and algebraic complexity”, Techn. Rep. RUU-CS-79-1, University of Utrecht (1979), *Informatik Spektrum* 3 (1980) 172-180.

** “Computers and Information Processing”(186 p, in Dutch), Techn. Rep. RUU-CS-79-2, University of Utrecht (1979).

“Rapid subtree identification revisited”(with M.H. Overmars), Techn. Rep. RUU-CS-79-3, University of Utrecht (1979) (outline presented at the 15th Dutch Math. Congress, Eindhoven, 1979).

“A classroom note on computing products in finite-dimensional algebras”(with H. Alt), *EATCS Bulletin* 8 (june 1979) pp. 14-17.

“Report on STOC 79”, *EATCS Bulletin* 8 (june 1979), pp. 57-63.

“A family of similarity measures between strings”(with N.V. Findler), *IEEE Transact. on Pattern Analysis and Machine Intelligence*, vol. PAM-1 (1979) 116-118.

“The complexity of complex division”(with H. Alt), *Proceedings FCT 79*, Wendisch-Rietz, 1979.

“The complexity of basic complex operations”(with H. Alt), Techn. Rep. RUU-CS-79-4, University of Utrecht (1979), *Computing* 27 (1981) 205-215.

“Squaring a 2 x 2 matrix”, EATCS Bulletin 9 (oct. 1979), pp. 11-13.

“Dynamization of decomposable searching problems”(with D. Wood), Techn. Rep. RUU-CS-79-5, University of Utrecht (1979), Inform. Proc. Letters 10 (1980) 51-56.

“The measure problem for rectangular ranges in d-space”(with D. Wood), Techn. Rep. RUU-CS-79-6, University of Utrecht (1979), J. of Algorithms 2 (1981) 282-300.

“Maintenance of configurations in the plane”(with M.H. Overmars), Techn. Rep. RUU-CS-79-9, University of Utrecht (1979).

“Two general methods for dynamizing decomposable searching problems”(with M.H. Overmars), Techn. Rep. RUU-CS-79-10, University of Utrecht (1979), Computing 26 (1981) 155-166.

1980

“Further comments on Bykat’s convex hull algorithm”(with M.H. Overmars), Inf. Proc. Letters 10 (1980) 209-212.

“Dynamic systems of static datastructures”(with H. Maurer), Bericht 42, Inst. f. Informationsverarb., TU Graz, 1980.

** “Foundations of Computer Science III”, part 1: MC Tract 108, Part II: MC Tract 109 (edited with J.W. de Bakker), Mathem. Centre, Amsterdam 1980.

“The single chip computer”(in Dutch), contribution in P. Slaa (ed.), De Chips Revolutie, Rep. Studium Generale, RU Utrecht, 1980, pp. 3-26.

“Some principles for dynamizing decomposable searching problems”(with M.H. Overmars), Techn. Rep. RUU-CS-80-1, University of Utrecht (1980), Inf. Proc. Lett. 12 (1981) 49-53.

“Dynamic multi-dimensional data-structures based on quad- and k-d trees”, (with M.H. Overmars), Techn. Rep. RUU-CS-80-2, University of Utrecht (1980) (outline presented at the 16th Dutch Math. Congress, Nijmegen, 1980), Acta Informatica 17 (1982) 267-285.

“Triangulating a star-shaped polygon”(with A.A. Schoone), Techn. Rep. RUU-CS-80-3, University of Utrecht (1980).

“Reducing 3DM to CLIQUE and HAMILTONIAN CIRCUIT”(with M.J. Fischer), EATCS Bulletin 11, 1980, p. 15-19.

“Multi-dimensional algorithms and datastructures: bibliography”(with H. Edelsbrunner, Graz), EATCS Bulletin 11, 1980, p. 46-74.

“Report on STOC 80”, EATCS Bulletin 11, 1980, p. 145-152.

“Dynamically maintaining configurations in the plane”(with M.H. Overmars), Proc. 12th Annual ACM Symp. Theory of Computing, Los Angeles, 1980, p. 135-145.

** “Automata, Languages and Programming: Seventh Colloquium” Springer Lecture Notes in Computer Science, vol. 85 (edited with J.W. de Bakker), Springer-Verlag, Heidelberg, 1980.

“Notes on Maintenance of configurations in the plane”(with M.H. Overmars), Techn. Rep. RUU-CS-80-5, University of Utrecht (1980).

“Dynamization of decomposable searching problems yielding good worst case bounds”(with M.H. Overmars), Techn. Rep. RUU-CS-80-6, University of Utrecht (1980), also: Proc. 5th GI Fachtagung Theor. Informatik, Springer Lecture Notes in Comput. Sci. 104 (1981) 224-233.

“Computers and (in)tractable problems (in Dutch), Techn. Rep. RUU-CS-80-8, University of Utrecht (1980) (presented in the MC Colloquium Series on ”Complexity and Algorithms”1980).

“Worst case optimal insertion and deletion methods for decomposable searching problems”(with M.H. Overmars), Techn. Rep. RUU-CS-80-10, University of Utrecht (1980), Inf. Proc. Lett. 12 (1981) 168-173.

“Untangling a traveling salesman tour in the plane”(with A.A. Schoone), Techn. Rep. RUU-CS-80-11, University of Utrecht (1980), also: Proc. 7th Conf. Graph-theoretic Concepts in Computer Science, Hanser-Verlag, 1982, p. 87-98. (Revised version to appear in Theor. Comp. Sci.).

“Efficient recognition of rational relations”(with M. Nivat), Techn. Rep. RUU-CS-80-12. University of Utrecht (1980), Inf. Proc. Lett. 14 (1982) 34-38 (Outline presented at the 17th Dutch Math. Congress, Amsterdam, 1981).

1981

“Maintenance of configurations in the plane: revised version”(with M.H. Overmars), Techn. Rep. RUU-CS-81-3, University of Utrecht (1981), J. Comp. Syst. Sci. 23 (1981) 166-204.

“Stratified balanced search trees”(with M.H. Overmars), Techn. Rep. RUU-CS-81-4, University of Utrecht (1981), Acta Informatica 18 (1983) 345-359.

“An elementary fact about unambiguity”, EATCS Bulletin 13, 1981, p. 4-6.

Supplement to “Multidimensional algorithms and data structures: a bibliography”(with H. Edelsbrunner, Graz), EATCS Bulletin 13, 1981, p. 79-85.

“Connected components of orthogonal geometric objects”(with H. Edelsbrunner, Th. Ott-

mann and D. Wood), Techn. Rep. 81-CS-04, McMaster University (1981), also: RAIRO Inform. Theor. 18 (1984) 171-183.

“Positions of symbols in context-free derivations”, EATCS Bulletin 15, 1981, p. 54-55.

“A basis for dataflow computing”(with A.P.W. Böhm), Techn. Rep. RUU-CS-81-6, University of Utrecht (1981).

“The art of dynamizing”(with M.H. Overmars), Techn. Rep. RUU-CS-81-8, University of Utrecht (1981), also: Math. Foundations of Computer Science 1981 (Proc. 10th Symposium), Springer Lect. Notes in Computer Science 118 (1981) 121-131.

“VLSI-layouts of perfect binary trees”(with M.H. Overmars and D. Wood) , Techn. Rep. RUU-CS-81-13, University of Utrecht (1981), to appear.

“Organisation of operating systems for computer networks”(in Dutch) (with I.J.M. Birkhoff), Techn. Rep. RUU-CS-81-14, University of Utrecht (1981).

“Grenzen aan de programmeerbaarheid”, notes for the INW working group, unpublished, August 1981, 6 pages.

“The bounded aspects ratio problem for VLSI-layouts of perfect binary trees”, Techn. Rep. RUU-CS-81-16, University of Utrecht (1981).

“Graphics and computational geometry”, Techn. Rep. RUU-CS-81-18, University of Utrecht (1981), also in Proc. AFCET Symp. on “the Mathematics of Computer Science”, Paris, 1982, pp. 159-165.

1982

** “Fundamental algorithms”(295 p., in Dutch), Techn. Rep. RUU-CS-82-1, University of Utrecht (1982).

“Wire routing is NP-complete”(with M.R. Kramer), Techn. Rep. RUU-CS-82-4, University of Utrecht, 1982.

“The NP-completeness of finding minimum area layouts for VLSI circuits”(with M.R. Kramer), Techn. Rep. RUU-CS-82-6, University of Utrecht, 1982.

“The complexity of VLSI circuits for arbitrary boolean functions”(with M.R. Kramer), Techn. Rep. RUU-CS-82-7, in: E. Börger et. al. (eds.), Logic and Machines: decision problems and complexity, Lect. Notes in Comp. Sci. 171 (1984) 397-407, Springer-Verlag.

“Distributed computing”, Techn. Rep. RUU-CS-82-8, University of Utrecht, also in: J.W, de Bakker & J. van Leeuwen (eds.), Foundations of Computer Science IV, Part 1, MC Tract

158, Mathematical Centre, Amsterdam, 1983, pp. 1-34.

“Systolic computation and VLSI”, Techn. Rep. RUU-CS-82-9, University of Utrecht, also in: J.W. de Bakker & J. van Leeuwen (eds.), Foundations of Computer Science IV, Part 1, MC Tract 158, Mathematical Centre, Amsterdam, 1983, pp. 75-103.

** Colloquium Complexity and Algorithms, two volumes, MC Syllabus 48.1 & 48.2, (edited with P. Vitanyi and P. van Emde Boas), Mathematical Centre, Amsterdam, 1982.

“Computers and (in)tractable Problems”(in Dutch), in: P. Vitanyi, J. van Leeuwen & P. van Emde Boas (eds.), Colloquium Complexity and Algorithms, MC Syll. 48.1, Mathematical Centre, Amsterdam, 1982, pp. 3-26.

“Multidimensional data structures and algorithms: a bibliography”(with H. Edelsbrunner), Bericht F 104, Institut f. Informationsverarbeitung, Graz, 1982.

“Periodic versus arbitrary tessellations of the plane using polyominoes of a single type”(with H.A.G. Wijshoff), Techn. Rep. RUU-CS-82-11, University of Utrecht, also in: A.B. Cremers & H.P. Kriegel (eds.), 6th Conference on Theoretical Computer Science, Springer Lecture Notes in Computer Science 145 (1983) 353-365.

1983

“Compositions of double diagonal and cross Latin squares”(with H.L. Bodlaender and H.A.G. Wijshoff), Techn. Rep. RUU-CS-83-1, University of Utrecht, revised version: Nieuw Archief v. Wiskunde 4(1984) 256-266.

“Periodic storage schemes with a minimum number of memory banks”(with H.A.G. Wijshoff), Techn. Rep. RUU-CS-83-4, University of Utrecht.

“Fundamental theorems in dataflow computing”(with A.P.W. Böhm) in: L. Priese (ed.), Report on the 1st GTI-Workshop, Bericht 13/Reihe Theoretische Informatik, Universität Paderborn, 1983.

“Periodic storage mappings for vector computations (with H.A.G. Wijshoff), in: Proc. Workshop ”Graph-theoretic Concepts in Computer Science”(WG’83), Osnabrück, 1983.

“g-schemes and d-ordered vectors”(with H.A.G. Wijshoff), Techn. Rep. RUU-CS-83-7, University of Utrecht (1983), IEEE Trans. Comput. C-36 (1987) 233-239.

“A linearity condition for periodic skewing schemes”(with H.A.G. Wijshoff), Techn. Rep. RUU-CS-83-10, University of Utrecht (1983).

“Data mappings in large parallel computers”(with H.A.G. Wijshoff), Techn. Rep. RUU-CS-83-11, University of Utrecht, also in: I. Kupka (ed.), GI-13. Jahrestagung, Informatik Fb 73, Springer-Verlag, 1983, pp. 8-20.

** “Foundations of Computer Science IV”: Distributed Systems, Part 1: MC Tract 158, Part 2: MC Tract 159, (edited with J.W. de Bakker), Mathematical Centre, Amsterdam, 1983.

“Parallel computers and algorithms”, Techn. Rep. RUU-CS-83-13, University of Utrecht.
“The technological image of 1984”(in Dutch), Techn. Rep. RUU-CS-83-14, University of Utrecht, 1984.

“Routing with compact routing tables”(with R.B. Tan), Techn. Rep. RUU-CS-83-16, University of Utrecht.

** “Operating Systems”(231p. in Dutch) (with H.P. Penning), Techn. Rep. RUU-CS-83-18, University of Utrecht.

1984

“The structure of periodic storage schemes for parallel memories”(with H.A.G. Wijshoff), Techn. Rep. RUU-CS-84-1, University of Utrecht (1984), also: IEEE Trans. Computers C-34 (1985) 501-505.

“The minimum bisection width of (three-dimensional) blocks”(with H.L. Bodlaender), Techn. Rep. RUU-CS-84-2, University of Utrecht (1984), also as: ”A colorful proof of an obvious theorem”, in: Dopo Le Parole, Album Amicorum for A.K. Lenstra, 1984, pp. 25-30.

“Universiteiten niet onverdeeld blij met miljarden-injectie, Prof. Van Leeuwen over informatika-plan”, interview, Utrechts Universiteitsblad, 3 Februari 1984, p 5.

“Systolische Berechnungen und VLSI”(with M.R. Kramer), Informatik-Spektrum 7 (1984) 154-165.

“Periodic storage schemes for parallel memories”(with H.A.G. Wijshoff), Proc. PARS Workshop Erlangen (April 1984), PARS Mitteilungen 2 (Oct 1984) 107-115.
