

Brief CV Sjoerd Verduyn Lunel (Universiteit Utrecht)

email: S.M.VerduynLunel@uu.nl

Verduyn Lunel studied undergraduate Mathematics with Computer Science and Physics at the Universities of Delft (1978-1980) and Amsterdam (1980-1983). He was a scientific assistant at the Centre for Mathematics and Computer Science (1981-1983) and received a degree in Mathematics with Mathematical Economics from the University of Amsterdam in 1983. In 1984 he joined AT&T and Philips in Hilversum (1984-1985) and Indian Hill Bell Labs Chicago (1986). In January 1987 he continued his career as a research assistant at the University of Leiden and in October 1988 he received a Ph.D. in mathematics from the University of Leiden for research carried out under supervision of O. Diekmann and L.A. Peletier.

Since 1988 he has had, a postdoctoral position at Brown University in Providence, RI; an assistant professorship at Georgia Institute of Technology, Atlanta, Georgia; a postdoctoral position at the Vrije Universiteit Amsterdam; an assistant and associate professorship at the University of Amsterdam; a full professorship in Mathematical Analysis at the Vrije Universiteit; a chair in Analysis from 1999 to 2012 at Universiteit Leiden; and since 2012 the chair in Applied Analysis at Universiteit Utrecht. He was a visiting professor at University of California at San Diego, University of Colorado, Georgia Institute of Technology, University of Rome “Tor Vergata”, and Rutgers University.

Verduyn Lunel received the C.J. Kok prijs from the University of Leiden in 1989, a fellowship from the Royal Netherlands Academy of Arts and Sciences (1992-1995), and stipends and grants from C.N.R and N.S.F. to visit Italy and the USA. In 1998 he was awarded a prestigious PIONIER grant for the research project ‘Analysis, Dynamical Systems and Applications’ from the Netherlands Organisation for Scientific Research (NWO). Verduyn Lunel is an elected member of the Royal Holland Society of Sciences and Humanities.

From 2004 to 2007 he was the Director of both the Mathematical Institute and Leiden Institute of Advanced Computer Science at Leiden University. From 2007 to September 2012, he was the Dean of the Faculty of Science at Leiden University. He was a member of a number of national committees and advisory boards, and currently is a member of the board of “Platform Wiskunde Nederland” and the chair of the Advisory Board of the Leiden Institute of Physics. He was co-Editor-in-Chief of *Integral Equations and Operator Theory* (2000-2009) and on the editorial board of a number of journals. He is currently associate editor of *SIAM Journal on Mathematical Analysis* and of *Integral Equations and Operator Theory*.

Verduyn Lunel is the author of a large number of scientific publications, among which two books and two research monographs. His current research interests include infinite dimensional dynamical systems, differential equations with time lags, lattice differential equations, operator theory, nonlinear time series, the interaction between dynamics and numerics with specific applications in chemical engineering and mathematical biology. He has been invited to give talks and short courses on his research interests in over 100 international conferences and foreign departments.
